SAFETY PIN TREE

Included in your bag: 8 large safety pins, 5 small safety pins, 1 star bead, 31 green beads, 7 yellow beads, 16 assorted color beads, 1 green pipe cleaner

1.Place 4 beads on each of the large safety pins. Make sure to have 2 to 3 green beads on each pin and do not place two various colored beads next to each other.

2. Thread the pipe cleaner through the head of the safety pins, placing a yellow bead in between each pin. Make sure all of the pins are facing the same direction. Cut excess pipe cleaner and carefully fold back the ends to secure.

3. Place 3 beads on each of the small safety pins, following the same manner as the large pins. 2 of the 3 beads on each pin should be green.

4. Thread the pipe cleaner through using this pattern: head of small pin, bottoms of 2 large pins, head of small pin, bottoms of 2 large pins, repeat. Cut excess pipe cleaner and secure.

5. Thread the pipe cleaner through the bottoms of the small pins. Twist the pipe cleaner to secure.

6. Feed the star bead through both ends of the pipe cleaner, making sure the star is not upside-down. Twist to secure.

7. Make a loop with the remaining length of the pipe cleaner to create a hanger, twisting both ends to secure.
