

# Black Glue Art

Included: Watercolor paper, squeeze bottle with black glue, watercolors

What you'll need: Pencil, salt (optional)

Step 1: Trace out a design onto your watercolor paper lightly with a pencil.

Step 2: Use the bottle of black glue to trace your drawing. Squeeze the bottle gently- it may come out a bit fast!

Step 3: Let the glue completely dry (overnight is best).

Step 4: After the glue is completely dry, use the watercolors to color your drawing. To make a cool texture on your paper, sprinkle salt on your drawing while it's still wet!
